

Computer Logic Training Board has been designed specifically for the study of Octal to Binary Encoder. The Training board gives a understanding of the phenomena which encodes 8 data lines ( Octal ) to 3 lines binary encoder. The board is absolutely self contained and requires no other apparatus.

Practical experience on this board carries a great educative value for science and Engineering students.

**Object:**

To Study of Octal to Binary Encoder.

**Feature:**

The board consists of the following built in parts :

01. +5V DC at 100 mA, IC Regulated Power Supply internally connected.
  02. 8 Data lines to 3 lines IC-74148.
  03. 9 SPDT switches for Logic selections.
  04. 14 LEDs for visual indications of the status.
  05. Adequate no. of other Electronic Components.
  06. Mains ON/OFF switch, Fuse & Jewel light.
- \* The unit is operative on 230V  $\pm$ 10% at 50Hz AC Mains.
  - \* Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections/observation of waveforms.
  - \* Strongly supported by detailed Operating Instructions, giving details of Object Theory, Design procedures, Report Suggestions and Book References.

Note: Specifications are subject to change.
