Order Code - 46580
Synchronous Machine Training System

Synchronous Machines are used as Generators in power plants because of their characteristic relation of speed with frequency. The study of power generators is the part of most of the curriculum. 46580 “Synchronous Machine Training System” is an exclusive product designed to demonstrate the fundamental concepts of parallel operation of Three Phase Synchronous Generators. This product is equipped with advanced measurement system for AC Parameters and DC Parameters. It has inbuilt which is highly stable and accurate. Due to use of big size LCD display it is possible to observe multiple parameters simultaneously. The RISC microcontroller based design provides better resolution and sensitivity as compared to analog meters. The panel is also equipped with advanced as Phase Sequence Indicator Digital Synchroscope

Well as Conventional Lamps (Dark Lamp Method) to perform the synchronization of two generators. Students can learn the basics as well as advanced experiments and safety conditions with precautions that are encountered while generating power with multiple generators . Various terminals including three phase starter terminals are provided on front panel to provide flexibility and ease of connections while performing experiments. Students can perform experiments like Synchronization of parallel generators using advanced and conventional methods, behavior of generator, load sharing, power transfer parameters, analysis of voltage regulation of generator, V curve and inverse V curve in Three Phase Synchronous Generators with a vast flexibility.

Note: Specifications are subject to change.

Tesca Technologies Pvt. Ltd.

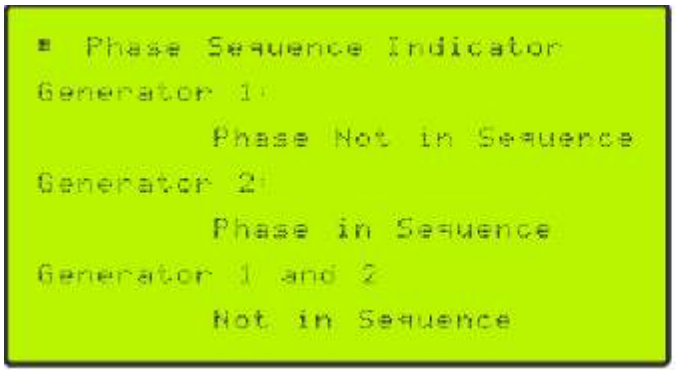
Features

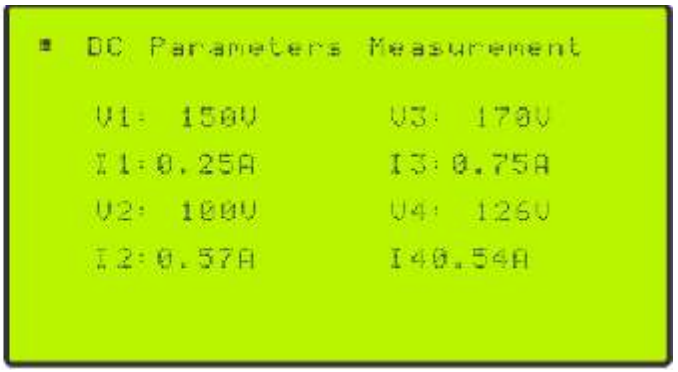
- Two Identical Motor Generator Set
- Electrical Loading Arrangement
- 240 X 128 Graphical LCD Display
- RISC Microcontroller based design for measurement
- High resolution ADC for accurate measurement
- High sensitive to change in reading for better controlling
- Inbuilt Digital Phase Sequence Indicator
- Equipped with Synchroscope
- Inbuilt Multifunction Meter for AC & DC Measurement
- Lamps are provided on front panel for synchronisation
- Designed considering all the safety standards
- Provided with shaft protection cover
- Equipped with supply indication lamps
- Heavy Duty Base/Channel
- Machine with Class "B" Insulation
- Diagrammatic representation for the ease of connections
- Learning material CD
- 2 Year Warranty

Measurement Window

Phase Sequence Indicator

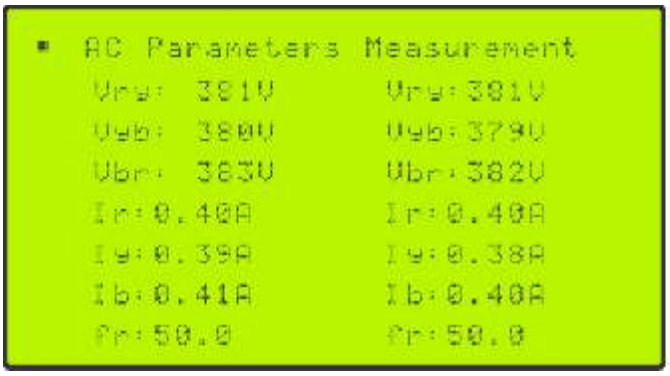


DC Parameters Measurement

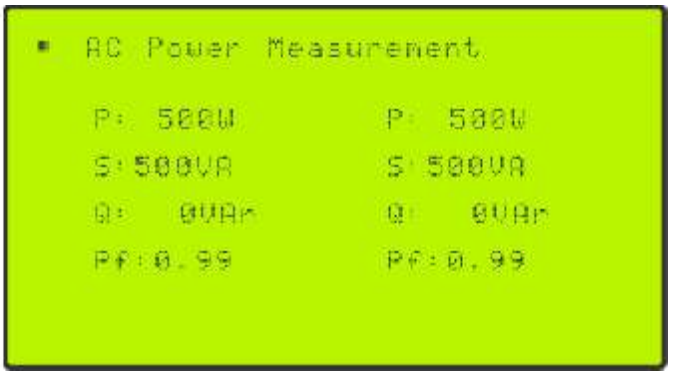


Phase Sequence Indicator is unique of its kind. It measures the phase sequence of both the generators individually. When both generators are in same phase then it indicates to proceed further. DC measurement block uses high resolution ADC for voltage measurement and current sensor for DC current measurement. This unit provides accurate voltage & current display with higher resolution.

AC Parameters Measurement



AC Power Measurement



AC measurement unit acts as multifunction meter to Display Current, Voltage, Frequency, Power & Power Factor. It measures parameters from both the generators.

Digital Three Phase Synchroscope

Lamp Arrangement (for Bright and Dark Lamp Experiment)

Scope of Learning

- — Synchronization of two Three Phase Alternators by
- a) Synchronoscope method
- b) Three dark lamp method
- c) Two bright one dark lamp method
- — Regulation of Three Phase Alternator by
- a) Open Circuit test
- b) Short Circuit test
- — Study & Analysis of V-Curve & Inverse V-Curve of Synchronous
- Motor

Technical Specifications

DC Power Supply

Input mains	: 230V AC ±10%, 50Hz
Fixed DC output	: 200V
Variable DC output	: 0-200V

AC Measurement Unit

Voltage	: ≥ 50 ≤ 500V
Current	: ≥ 0.2 ≤ 10A
Power	: ≥ 20 ≤ 2000W
Power Factor	: 0.99 Lead, Lag
Frequency	: ≥ 45 ≤ 55Hz

DC Measurement Unit

Voltage	: ≥ 25 ≤ 500V
Current	: ≥ 0.2 ≤ 10A

Phase Sequence Indicator : For both generators

Machines Specification

Both the M-G Sets are Flexibly Coupled and Mounted on a “C” channel Base

DC Machine

Type	: Shunt
Voltage Rating	: 200V
Rating	: 2 HP
Speed	: 1500 RPM (no load)
Insulation	: Class “B”

Three Phase Synchronous Machine

Type	: Salient Pole
Rating	: 3 HP
Voltage rating	: 415V AC
Speed	: 1500 RPM (no load)
Excitation Voltage	: 120V
Insulation	: Class “B”
Dimensions (mm)	: W 930 x D 350 x H 675 (Control Panel) W 250 x D 900 x H 400 (MG Set)
Weight	: 34kg (approx.) (Control Panel) 212kg (approx.) (MG Set 2 Nos.)

Optional

DC Power Supply

Rheostat 2.8A, 220 ohms (4 Nos.)

Three Phase Resistive Load

Note: Specifications are subject to change.
