

46589 RLC Resonance Trainer is unique product that provides a complete learning content for both Series and Parallel Resonance. Resonance is an interesting phenomenon in electrical circuits in which Inductive and Capacitive elements behave to make a Zero Impedance circuit. This explanation is given with the help of Passive circuits on the Trainer. Multiple combination of components has been provided so that students can calculate Resonance Frequencies for different combinations. Concept of Resonance Frequency is explained very clearly which can be easily seen either on Oscilloscope or on the board display.
